

WASHING TANK FOR BREAKS OF INDUSTRIAL VEHICLES AND LIKE

ABSTRACT

A washing tank (10) for brakes of industrial vehicles  
5 and like, foresees a trolley (11), equipped with a  
vessel (12) containing the washing liquid, and a  
collection tank (14). Between the aforementioned vessel  
(12) and the aforementioned collection tank (14) a  
first pump (18) is foreseen which draws the washing  
10 liquid from the aforementioned vessel (12) and through  
a first pipe (19), conveys it into the collection tank  
(14), and a second pump (17) which draws in the liquid  
and puts it back into the aforementioned vessel (12),  
through a second pipe (25).
